Increased security measures for G-8 Summit Meeting and G-20 Summit Meeting Toronto

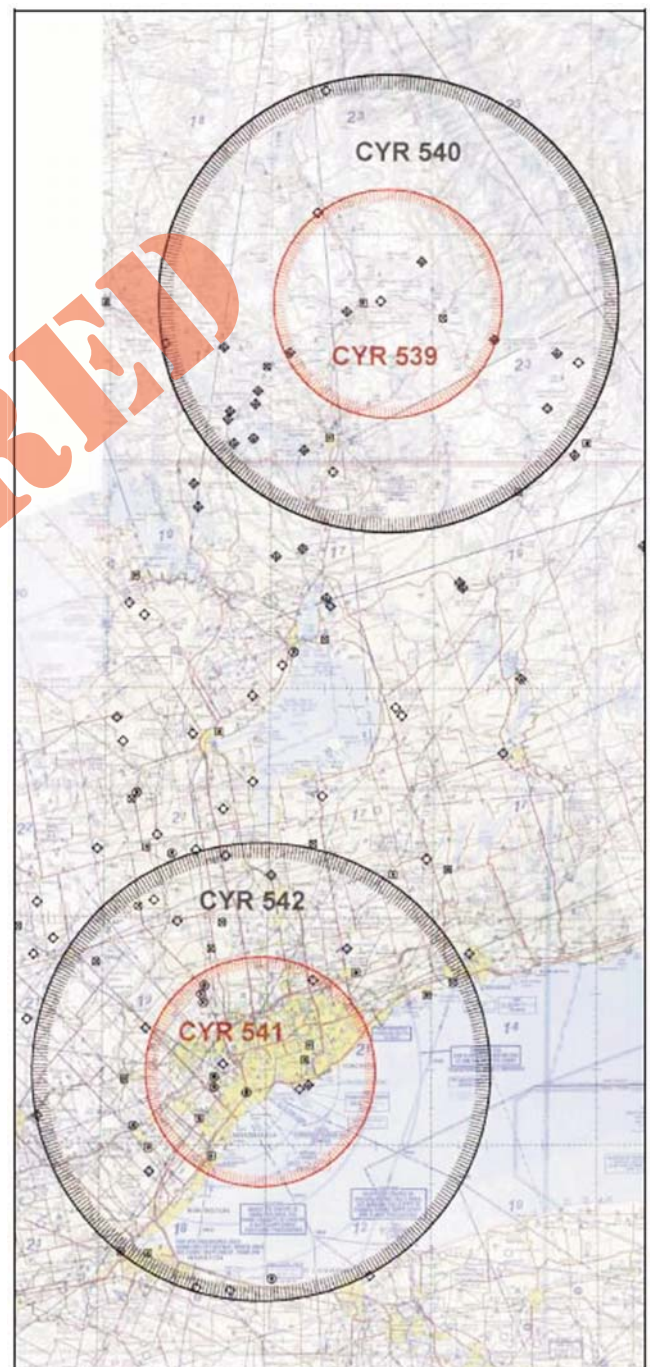

The Security Committee of ALPA International has issued the following Security Bulletin:

Background

The Government of Canada will host the G8 Summit in Huntsville/Deerhurst, Ontario from June 25-26, 2010 and the G20 Summit in Toronto, Ontario from June 26-27, 2010. For safety and security reasons, Class F restricted airspace will be established around the summit locations. Because many world leaders and VIPs are anticipated to attend these events, protest activity may occur. Consequently, security measures throughout the area, including the airspace around Lester B. Pearson International Airport (CYYZ), will be enhanced during this period. Government authorities advise that added security precautions will be mostly transparent. Currently, there is no credible information or intelligence indicating any specific threat or heightened security concern. However, normal operations may be impacted as a result of extraordinary measures implemented to ensure the safety and security of diplomats, dignitaries, and the general population. Impact of airspace restrictions on airline operations should be minimal, but crewmembers are encouraged to pay particular attention to NOTAMS and security regulations governing flight crew ramp movement. You are also urged to maintain heightened situational awareness in and around airport facilities during this time period, as well as when in hotel and urban environments.

Summary of airspace changes

The accompanying graphic depicts the designated Class "F" Restricted Airspace that will be established around the summit locations from June 24 to June 28. Note that a portion of the affected area is a Temporary Flight Restriction (TFR) in US airspace northwest of BUF. Under the authority of the Canadian Government, any unauthorized aerial activity will be subjected to intercept by military aircraft. Details on airspace structure, general operating rules and procedures that will be in effect during the Summit periods are published in Transport Canada Aeronautical Information Publication (AIP) Supplement 28/10:

This chart is for guidance only and should not be used for navigation.

Recommendations

- ▶ Review any/all company bulletins/information regarding the G8/G20 event
- ▶ Review any/all Transport Canada directives, AIP circulars/supplements, NOTAMS, etc., related to airspace restrictions and procedural considerations
- ▶ Expect enhanced security measures and the possibility of delays at the airport and in and around the city of Toronto
- ▶ Avoid demonstrations as they can quickly escalate into violence
- ▶ Stay abreast of local events and be aware of your surroundings at all times
- ▶ Plan extra travel time, as demonstrations and motorcades may delay vehicular traffic and precipitate road closures
- ▶ Expect increased airport and mass transit activity.
- ▶ Be mindful of an increase in pickpocket and other forms of criminal activity
- ▶ Avoid areas near embassies and consulates, if possible
- ▶ Remember that demands on police and other emergency response services may delay response to calls for assistance
- ▶ Although the possibility of military intercept is remote, please review CFS Section F—Emergency Procedures—Interception of Civil Aircraft

IFALPA provides this data for information only, In all cases pilots should follow their company's guidance and procedures.

In the interests of flight safety, reproduction of this bulletin in whole or in part is encouraged. It may not be offered for sale or used commercially. All reprints must credit IFALPA.
